

Chairman and Board Members:

Please consider the welfare of the listening public when making the decision in Petition 04-160.

XM radio has provided a way for us to enjoy radio without listening to repetitive commercials and boring talk. I take my XM radio everywhere with me and I depend on it for keeping me informed on local weather and traffic when traveling.

If it is no longer available, I will do without .. I won't tune into FM or AM to search these details out and I am sure most XM users won't, so how is eliminating this service going to help AM/FM or anyone else?

Sincerely, Nancy Saville
